

AMERICAN PERSPECTIVES ON EARLY DETECTION OF ALZHEIMER'S DISEASE IN THE ERA OF TREATMENT

3 in 5

consider **cognitive screening**
very important

4 in 5

consider **early diagnosis**
very important

4 in 5

would **want to know** if
they had Alzheimer's
before symptoms appear
or affect daily activities

9 in 10

would want a
simple test to allow for
early treatment

3 in 4

say having **treatments** that
slow progression makes **early
diagnosis** more important

9 in 10

would want a **medication that could
slow the progression** of Alzheimer's
disease following a diagnosis

3 in 5

would accept **moderate or
high levels of risk** to take medication
that slows the progression of
Alzheimer's disease

Up to 4 in 5

feel optimistic about the **future of Alzheimer's treatment**
